

Job Title: Cybersecurity Analyst
Department: Information Security
Location: London, UK
Reports To: Chief Information Security Officer

Job Summary:

At SecureTech Solutions, we are hiring a Cybersecurity Analyst to protect our systems and data from cyber threats. You will identify vulnerabilities, monitor networks for threats, and implement effective security measures.

Responsibilities:

- Conduct vulnerability assessments and penetration tests.
- Monitor security systems and respond to incidents promptly.
- Implement and maintain firewalls, encryption, and intrusion detection systems.
- Create detailed security reports and recommendations.
- Stay informed about the latest cyber threats and mitigation strategies.

Qualifications:

- **Education:** Bachelor's degree in Cybersecurity, Computer Science, or related field.
- **Experience:** 2+ years in cybersecurity or IT security.
- **Technical Skills:** Familiarity with SIEM tools, firewalls, and encryption technologies; knowledge of ISO 27001 compliance.
- **Soft Skills:** Strong analytical skills, excellent problem-solving abilities, and effective communication.

Preferred Skills:

- Experience with ethical hacking or penetration testing tools.
- Knowledge of cloud security best practices.

Benefits:

- Competitive salary up to £70,000 annually.
- Private health insurance and wellness benefits.
- Annual training budget for cybersecurity certifications.
- Flexible hybrid work schedule.

Company Overview:

SecureTech Solutions is a leader in cybersecurity, safeguarding businesses from cyber threats across industries. We promote a collaborative and innovative work environment.

How to Apply:

Submit your CV and cover letter to careers@securetech.com by March 5th, 2025. Mention "Cybersecurity Analyst Application" in the subject line.
